

October 4, 2011

Dear Colleagues,

On behalf of the ICICTE Steering Committee, I am pleased to announce that ICICTE 2012 will be held at the Rodos Palace Hotel on the island of Rhodes, Greece, from 5–7 July 2012. We cordially invite you to participate in the event as either a delegate or presenter.

Once again ICICTE will look at the effects that technological innovation is having on education in all its formats. This year, the conference is emphasizing the many challenges and new directions presented by technological innovations in educational settings, the internationalization of institutions and of education, the diverse needs of students in different educational settings, and the intersection between political economy and educational technology.

As regular visitors to the conference will tell you, we pride ourselves on offering not only a high level of academic excellence, but also an intimate atmosphere that creates camaraderie, stimulates academic interaction and fosters development of innovative projects and networks across the world. ICICTE is small enough to allow extensive interaction between delegates, yet with a high level of representation from organisations and individuals from a wide range of disciplines and countries. Those attending ICICTE 2012 will leave with an excellent overview of current thinking and practices in applications of technology to education.

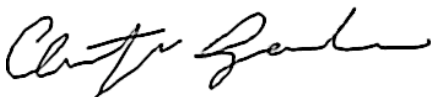

A lot of people who come once to ICICTE will do so again many times. Certainly, our location this year on the outskirts of Rhodes' Old Town should serve as added incentive for you to join us at the conference.

The website for ICICTE 2012 is now live and can be viewed at: <http://www.icicte.org>

If you wish to present a paper at ICICTE 2012, either on one of the special themes or any of the other themes listed on the conference website, and would like to have your paper published in the conference proceedings submit your proposal at <http://www.icicte.org/ICICTE12Papers.htm> by **January 13, 2012**. Poster and workshop proposals can also be submitted. All submissions and papers are peer-reviewed by the Scientific committee.

For any further information please feel free to contact us any time. I look forward to seeing you in Rhodes in 2012.

Cordially on behalf of the ICICTE 2011 Steering Committee

A handwritten signature in black ink, appearing to read "Chris Barlow".
