

ICICTE
2013

International Conference on Information
Communication Technologies in Education

Crete, Greece - 4 – 6 July, 2013

Dear Colleagues,

On behalf of the ICICTE Steering Committee, I am pleased to announce that ICICTE 2013 will be held at the Minoa Palace Resort and Spa on the island of Crete, Greece, from 4-6 July 2013. We cordially invite you to participate in the event as either a delegate or presenter.

Once again ICICTE will look at the effects that technological innovation is having on education in all its formats. This year, the conference is emphasizing the many challenges and new directions presented by technological innovations in educational settings. Thematic streams will include alternative processes, procedures, techniques and tools for creating learning environments appropriate for the twenty-first century.

As regular visitors to the conference will tell you, we pride ourselves on offering not only a high level of academic excellence, but also an intimate atmosphere that creates camaraderie, stimulates academic interaction and fosters development of innovative projects and networks across the world. ICICTE is small enough to allow extensive interaction between delegates, yet with a high level of representation from organisations and individuals from a wide range of disciplines and countries. Those attending ICICTE 2013 will leave with an excellent overview of current thinking and practices in applications of technology to education.

A lot of people who come once to ICICTE will do so again many times. Certainly, our location this year near Haniá, overlooked by the White Mountains of Crete, should serve as added incentive for you to join us at the conference.

The website for ICICTE 2013 is now live and can be viewed at: <http://www.icicte.org>

If you wish to present a paper at ICICTE 2013, either on one of the special themes or any of the other themes listed on the conference website, and would like to have your paper published in the conference proceedings submit your proposal to Nancy Pyrini at nancypyrini@icicte.org by February 8, 2013. (The Call for Papers is available at <http://www.icicte.org/ICICTE13Papers.htm>). Poster and workshop proposals can also be submitted. All submissions and papers are blind peer-reviewed by the Scientific committee.

For any further information please feel free to contact us any time. I look forward to seeing you in Crete in 2013.

Cordially on behalf of the ICICTE 2013 Steering Committee

Dr Christopher Barlow MSc BMus MIET MIOA
Chair, ICICTE Steering Committee
