

International Conference on Information
Communication Technologies in Education

Rhodes, Greece - 5 – 7 July, 2012

Dear Colleagues,

On behalf of the ICICTE Steering Committee, I am pleased to invite you to participate in ICICTE 2012. This will be held at the Rodos Palace Hotel on the island of Rhodes, Greece, from 5–7 July.

Once again ICICTE will look at the effects that technological innovation is having on education in all its formats. This year, the conference is emphasizing the many challenges and new directions presented by technological innovations in educational settings, the internationalization of institutions and of education, the diverse needs of students in different educational settings, and the intersection between political economy and educational technology.

Our keynote speaker this year is Professor Morten Flate Paulsen. Professor Paulsen is Director of Innovation and Development at NKI Nettstudier and Professor of Online Education at the Norwegian School of Information Technology (NITH) in Norway. He is editor of The International Review of Research in Open and Distance Learning, The European Journal of Open, Distance and E-Learning and the Asian Journal of Distance Education.

As regular visitors to the conference will tell you, we pride ourselves on offering not only a high level of academic excellence, but also an intimate atmosphere that creates camaraderie, stimulates academic interaction and fosters development of innovative projects and networks across the world. ICICTE is small enough to allow extensive interaction between delegates, yet with a high level of representation from organisations and individuals from a wide range of disciplines and countries.

A lot of people who come once to ICICTE will do so again many times. Certainly, our location this year on the outskirts of Rhodes' Old Town should serve as added incentive for you to join us at the conference.

If you wish to present a paper at ICICTE 2012, either on one of the special themes or any of the other themes listed on the conference website, and would like to have your paper published in the conference proceedings, submit your proposal online via the conference website at <http://www.icicte.org/ICICTE12Papers.htm>. All submissions and papers are peer-reviewed by the Scientific committee.

The deadline for abstract submission has been extended to 31 January. Delegates wishing to submit papers beyond this date should contact the conference director Nancy Pyrini at nancypyrini@icicte.org. The deadline for Workshops and poster submissions is 24th February.

For any further information please feel free to contact us any time. I look forward to seeing you in Rhodes in 2012.

Cordially on behalf of the ICICTE 2011 Steering Committee
