

Dear ICICTE  
delegate,

We would really love for ICICTE 2016 to be the great GET-TOGETHER year for a lot of those who participated in past sessions of the conference. So if you're one of those delegates, do try to submit a paper proposal so you can join us on Rhodes in July.

We've always thought of ICICTE as being a "family" and an enormous amount of friendships have developed during the many years of the conference. The friendships are both professional and social, so getting back together again with so many old friends is very desirable.

We really would love to have old participants return, and particularly this year, when we're going back to one of ICICTE's favourite Greek islands.

If you have a colleague who has been to one of our conferences, please do make sure he or she joins us. And you, of course, are more than welcome.

**Görg Mallia**

and Promotions  
Committee,  
ICICTE 2016*

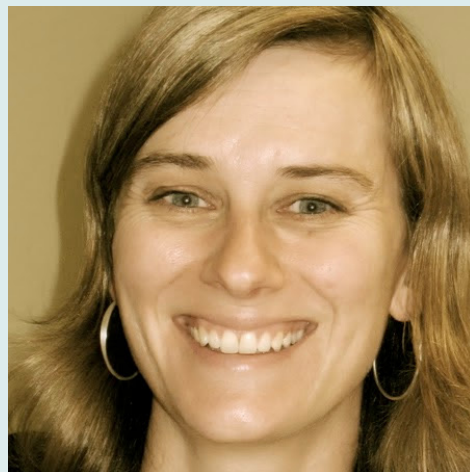

## ICICTE 2016 Keynote Speaker

We are very pleased to announce that **Dr Tannis Morgan** will be this year's Keynote Speaker, presenting the theme of **Future Considerations in the Adoption of Educational Technologies**.

Dr Morgan is the Associate Dean, Centre for Teaching, Learning, & Innovation at the Justice Institute of British Columbia where she is responsible for developing and implementing an e-learning strategy, and leads educational technology innovation and research projects. These include mobile learning, simulations, open education resources, and emerging delivery models.

Tannis began her work in distance education and e-learning with the Distance Education and Technology Centre at the University of British Columbia (UBC), under the direction of Dr Tony Bates and Dr Mark Bullen where she completed her PhD examining online teaching in international distance education contexts. She has worked within the Office of Learning Technology (formerly Distance Education and Technology) at UBC, and prior to coming to the JIBC, she was an instructional development consultant at the British Columbia Institute of Technology. She was a researcher with the Digital Learners in Higher Education research project with Dr Mark Bullen and colleagues from the University of Regina and the Open University of Catalonia.

Her current research focuses on student use of technology in applied education institutions and drivers that influence the uptake of open educational resources in higher education.

**Dr Tannis Morgan**

## ICICTE Critical Dates

### February 19

Deadline for paper proposals

### February 26

Notification from Scientific Committee about whether proposal has been accepted
